

SMARtracer™

The perfect compact, cost-effective
Fast Field Cycling relaxometer.

A cost-effective, high-performance,
easy to run bench-top Fast Field
Cycling system.

Designed for research and industrial
applications, it's enhanced by the
powerful and intuitive Storm6
software.

Engineered for versatility and performance, the
SMARtracer™ FFC relaxometer adapts to a wide
range of research areas and industrial applications.

Its **configurable design** can satisfy diverse needs and
applications. It **measures relaxation times** T_1 and T_2
from fractions of a millisecond to several seconds,
with high accuracy.

Advanced, user-programmable Storm6 software
works with sample **precise temperature control**
from -140°C to $+140^{\circ}\text{C}$, enabling reliable measure-
ments on solids, liquids, and complex mixtures, with
minimal operating costs.
